

# BUILDING BUSINESS WITH YOU

## USE GRANT FUNDING TO SOLVE GAPS IN YOUR BUSINESS SYSTEM AND EXCELLERATE YOUR GROWTH

As a business grows, it often develops pain points (internally within the team or externally with the clients they serve). At WSN we work with companies to help them identify their pain points, and strategize with them on how to best utilize grant funding to solve their pain points and grow revenue.

***We teach businesses how to use grants to fund their growth.***

## YOUR PERSONAL TRAINING CONTRACTOR

Our services to support your business in getting grants and resources in place are included in the grant funding process. In essence, WSN is an extra set of hands to help your business grow.

WSN becomes your “go to” grant resource partner.

## **EXPANDING ORGANIZATIONAL REVENUE: Plan Your Growth Using Grants**

### **How WSN can help set up training and grants to grow business:**

WSN meets with organizational leaders/ business owners to determine where they could benefit from funding. Identify what they want to target for growth. If you qualify and are interested in moving forward:

- 1) Organization or business signs a consulting agreement to work with WSN re: grants and resources.
- 2) Set up an action plan (timing) to target grants for organizations or business.
- 3) WSN structures the grant proposal(s), (for training grants sources the experts if required) and assists company in the grant application process. If grants approved:

WSN assists the company to implement grants, making sure paperwork is in place for grant (in case of audit), and ensures measurable outcomes are in place.

Grants are available for businesses (for profit) and non profit organizations.

Once you become a client of WSN, new grants and opportunities that are launched are communicated with you first.
